### Battery Use Tip:

1. if it possible then remove a charged JK6Y6 battery when your device is plugged in.
2. If possible then try to use energy-saving settings on your electronics.
3. Charge fully your new lithium-ion JK6Y6 battery for the first three cycles.
4. Avoid exposure to extreme temperatures, also your JK6Y6 battery can die if there will to fast temperature changes from low to high.
5. Always use the proper ac adapter charger for your device.
